

FedSPADE: One Integrated Figure for Theory-to-Reliability Evidence (CIFAR10-S Dir(0.5))

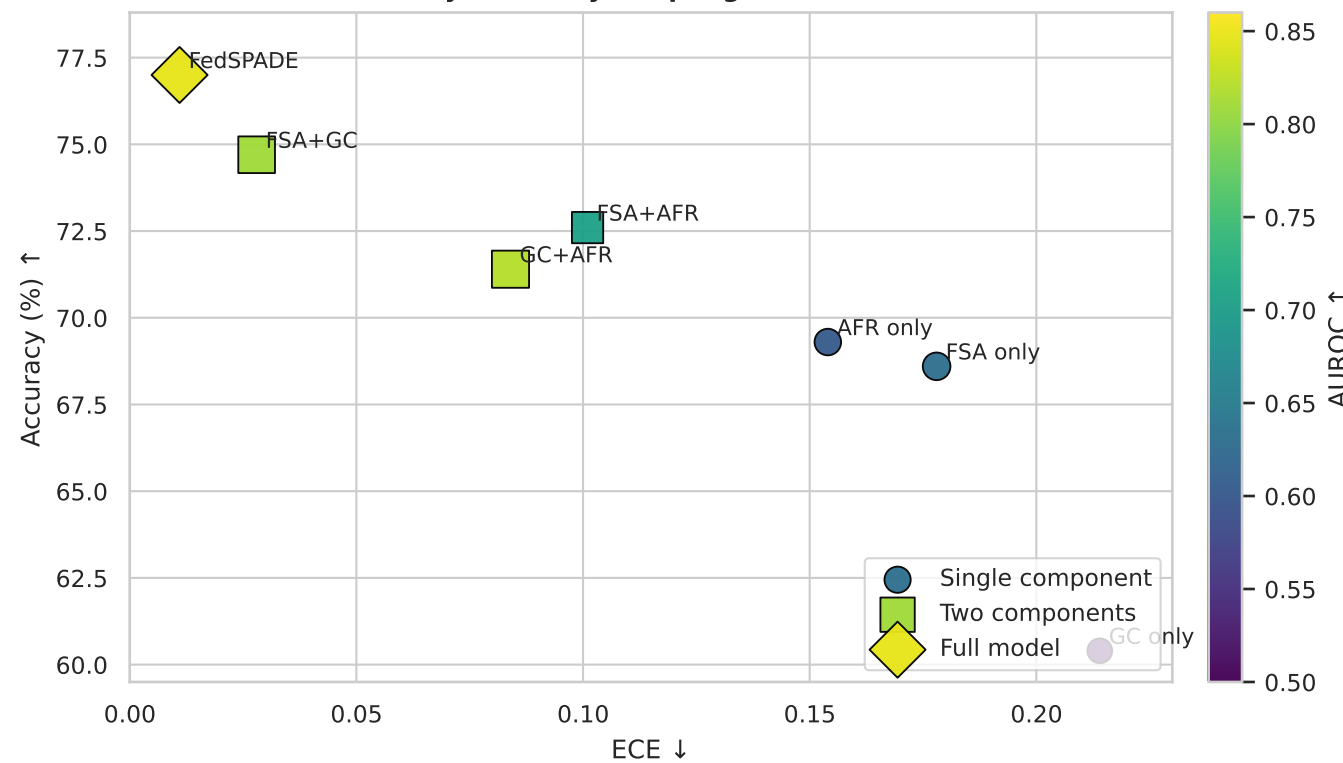

(a) Curvature/Conditioning Summary from Theory Figure

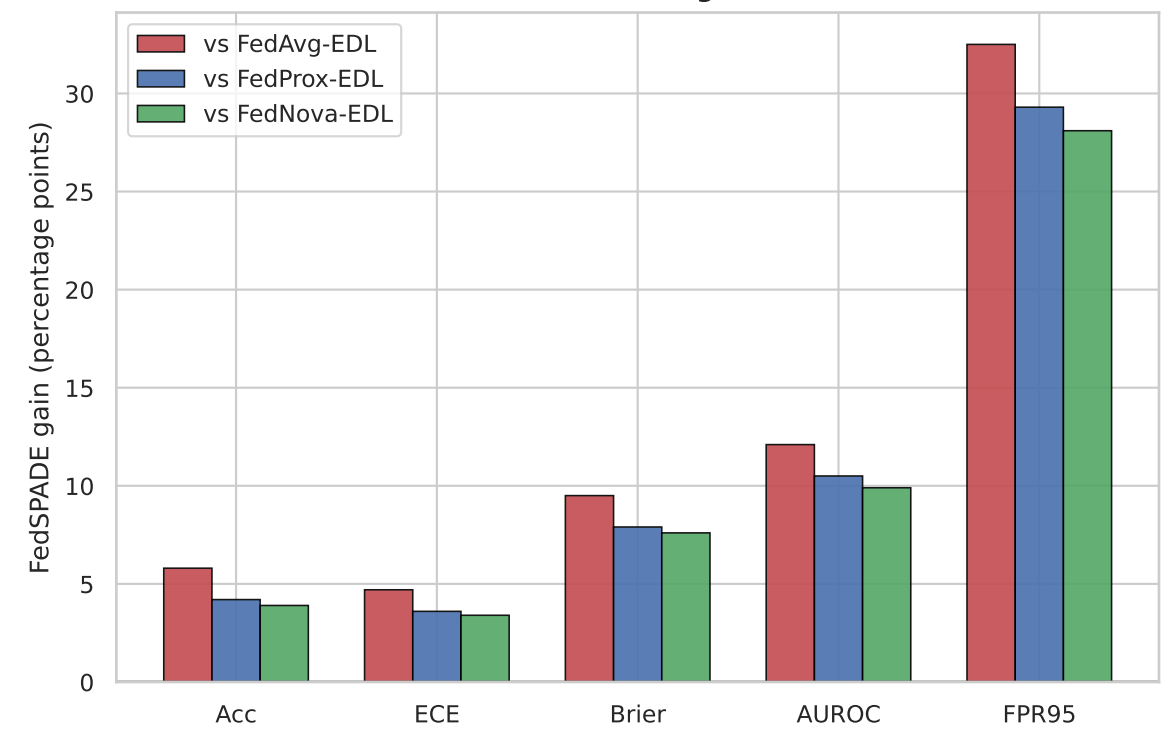

(b) Real Ablation Table Values (No Synthetic Data)

(c) Uncertainty-Accuracy Coupling (size ∝ better FPR95)

(d) Gains over Stabilizing EDL Baselines

All values are from reported tables/statistics: ablation table, stabilizing-EDL table, and theory-figure summary (AUCλmin+, condition number).
